- **MULTIPLE PAYMENT OPTIONS**  
Accept all major credit cards and electronic checks.
- **SIMPLE INTEGRATION**  
Integrate Customer Vault™ using our integration API.

## PCI Compliant Remote Data Storage Service

The Customer Vault™ service provides PCI Certified Remote Storage of Payment Information. The Customer Vault™ was designed specifically for businesses of any size to address concerns about handling customer payment information. The Customer Vault allows merchants to transmit their payment information for remote storage in PlanetAuthorizes' Level 1 PCI certified data facility.

Once the customer record has been securely transmitted to the Customer Vault™, the merchant can then initiate transactions remotely without having to access credit card or electronic check information directly. This process is accomplished without the merchant storing the customer's payment information in their local database or payment application.
