

RetailPayments™

Virtual Swipe Point of Sale Terminal for Retail & Mobile Merchants

RETAIL STORE

Accept all major credit cards using your high speed Internet connection.

MOBILE MERCHANTS

Accept customer payments anytime and anywhere with RetailPayments™ using any computer with an Internet connection.

FAST & SECURE

All payments are processed over a secure 128bit SSL connection.

RetailPayments™ is the fast and easy way to lower your payment processing costs.

- Accept all major credit cards using the RetailPayments™ POS Terminal Software for Microsoft Windows
- Lower your cost per transaction by using your high speed Internet connection, personal computer and a Magtek reader
- Process retail and online customer transactions
- Unlimited user license

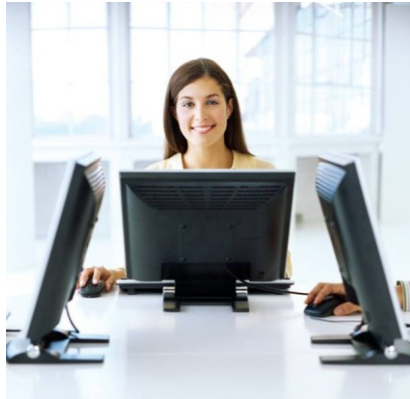

RetailPayments™ is a flexible and feature rich point-of-sale terminal for retail and mobile merchants. RetailPayments™ provides merchants with the ability to accept and capture all major credit card transactions as a "swipe" transaction using any laptop or personal computer with an Internet connection and Magtek reader.

Card present transactions are the most cost efficient transaction type since the merchant has the ability to swipe the customer's credit card in real-time. All payments are processed using the merchant's low cost (Cable Modem or DSL) Internet connection.

Merchants that operate at retail locations can now leverage the speed of the Internet to authorize credit card transactions in as little as three seconds! By combining our robust real-time payment gateway with an IP (Internet Protocol) enabled POS (Point-of-Sale) system, you get an end-to-end solution that is far more efficient and reliable than dial-up systems.

RetailPayments™ can be installed on multiple desktops thereby empowering your sales staff to quickly process credit card transactions.

Service Features and Benefits

Faster Checkout Times – Improve customer satisfaction and enhance customer loyalty by speeding up checkout lines.

Reduce Costs – Eliminate the expense of maintaining multiple dedicated telephone lines, while consolidating service costs for high speed Internet access.

Increased Productivity – Simplify the integration of payment information into your enterprise resource or accounting applications.

Stability and Reliability – RetailPayments™ handles millions of dollars worth of transactions every month, and is continuously monitored for performance.

* A merchant account is required to use our RetailPayments™ Virtual Swipe POS Terminal application and real-time payment gateway service. Additional fees apply. Contact your SaleManager representative for more information.
